Education

Gh Rasoni College of Engineering And Management

2022– 2026

B.Tech in Artificial Intilligence

Grade 8.47

Higher Secondary Education HSC - Class XII

2020– 2022

Sevasadan Junior College,Nagpur,Maharastra

percentage 70.67

Secondary Education SSC - Class X

2010– 2020

Shahu's Garden High School

percentage 90.60

Relevant Coursework

- Data Structure
- Database Management
- Artificial Intelligence
- OOPS
- Computer Network
- Big Data Computing
- Computer Vision And Deep Learning

Projects

Learning Management System | *HTML, CSS, Javascript*

- Developed an web application for new faculties admitted in the college or schools .
- Implemented HTML, CSS, and JavaScript to create an interactive design to web site.
- Made for new faculties that can see the video of the experienced faculty to get the help for their course related queries.
- It is designed in such a way that it enable faculties to upload their video.

Java based Bank Mangement System | *Java,SQL*

- Developed a backend module for a banking system using Java and SQL application for bank system that helps to do bank activities.
- Processed user input based on selected options of deposit or withdrawal.
- Depending upon input user id get added with money or withdraw the money.

Food Donation Platform | *React, TypeScript, Node.js, MySQL*

- Built full-stack web app connecting food donors with receivers using React and Node.js.
- Implemented JWT authentication, role-based access, and real-time notification system.
- Designed MySQL database with donation tracking and responsive UI with Tailwind CSS.

Multimodal Fraud Detection in Digital Transaction | *Python, XGBoost, SVM, ML*

- Built fraud detection system using 4 modalities: graph networks, text analysis, behavioral biometrics, and transaction patterns.
- Created unified prediction system with performance dashboards for digital transaction fraud detection.

Technical Skills

Programming Languages: Java,Python(Proficient),Javascript

Other Languages: HTML,CSS

Databases & Connectivity: OracleSql, MySQL, MongoDB,JDBC (Java Database Connectivity)

Developer Tools: VS Code, Eclipse,pycharm

AI Tools: Cursor AI,Bolt,Copilot.

Cloud/Backend Platforms: AWS (Basics)

Publication

An Approach For Learning Management System

Publication date :- 2024-04-10

International Journal For Multidisciplinary Research(IJFMR)

Volume 6, Issue 2, March-April 2024

- The process of the learning management system (LMS) in the New Normal period was observed in this study .
- This paper aims to reduce the difficulty coming for the new faculties while studying a particular course and its main focus is to give study material by which they can easily give guidance to the students.

Literature Review on Waste Food Management System

Publication date :- 2024-10-24

International Journal of Scientific Research in Engineering and Management (IJSREM)

Volume: 08 Issue: 10 , Oct - 2024

- In this study, it has been developed as a web application to stop food insecurity. In the world more than 829 million people are malnourished.
- The web application also uses real-time DB to store information. This project uses web technology to address food waste by facilitating the donation of leftover food from hotels, functions, to people in need.
- Through this website, donors can add details about the food they wish to donate, and volunteers from NGOs can view images of donated food from different donors.
